Готовность – IV кв. 2017 г.

Количество апартаментов 170

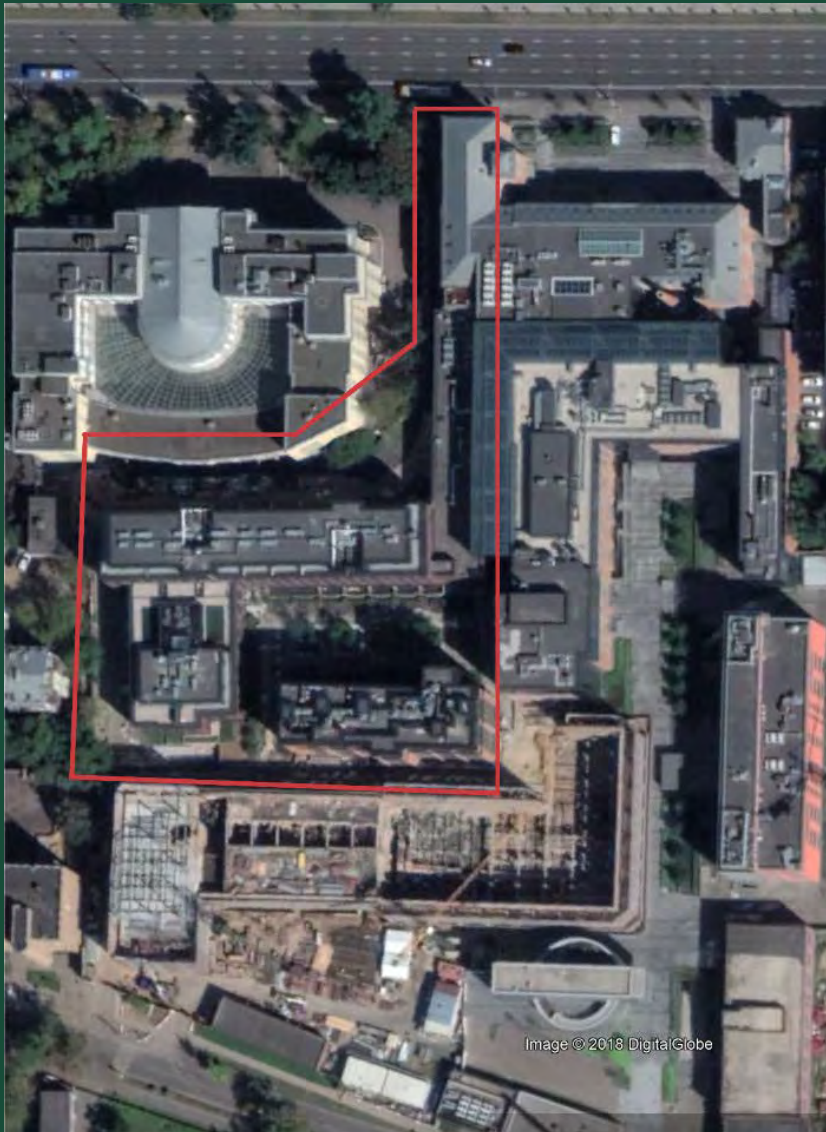

Переменная этажность – 3-7 этажей

Апартаменты	Количество	Средняя площадь
Студии	4	43 - 46 м ²
1-комнатные	59	35 - 50 м ²
2-комнатные	53	44 - 139 м ²
3-комнатные	33	65 - 124 м ²
4-комнатные	8	164 - 230 м ²
5-комнатные	2	157 м ²
6-комнатные	1	227 м ²

КОМАНДА ПРОЕКТА

Собственник – **O1 Properties**
Технический заказчик – **City Developer**
Архитектор офисной части – **John McAslan+Partners**
Архитектор жилой части – **IND Architects**
Генеральный подрядчик – **Svargo group**
Подрядчик по отделочным работам – **PRIDEX Group**
Ландшафтный архитектор – **Udo Dagenbach**
Управляющая компания – **Sawatzky Property Management**

В этом решении предлагается устройство небольших холмов, расположенных ассиметрично оси двора. Один холм для игры детей. Холмы имеют ступенчатую структуру, которую формируют стальные панели. На уровнях холмов высаживаются низкие изгороди, вечнозеленые почвопокровные растения с цветущими многолетниками. 5 деревьев интегрированы в холмы. Скамейки расположены на стенках холмов.

As a reference to the former use for cake production here we suggest a pop art style variant using the circle shape of a cake as a guiding design scheme.

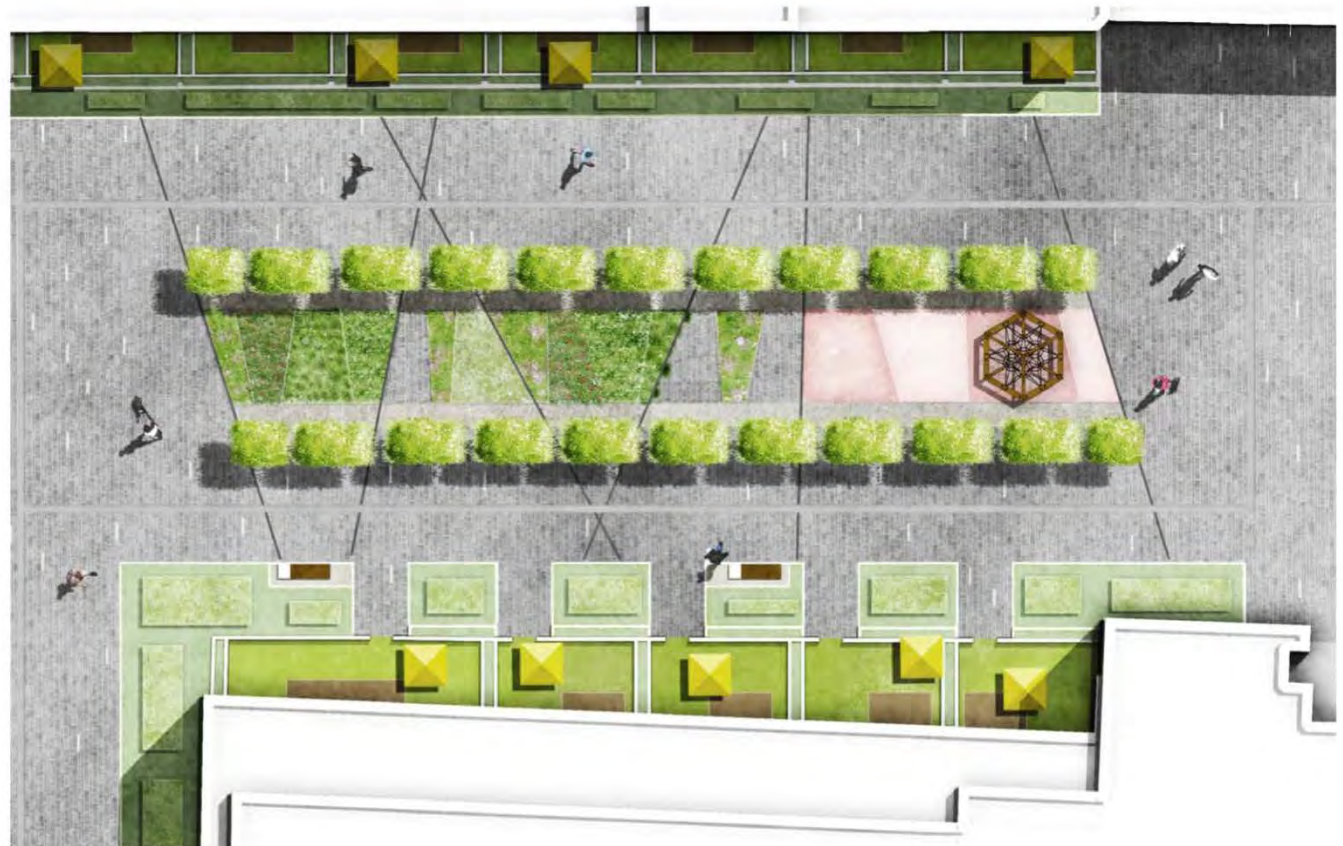

12 circles in different diameters are installed some flat as paving design and space to install a play element, some as space to plant trees and some as three dimensional uprising rings which are planted with low hedges and decorative grasses, and perennials. The rings walls could be steel panels, painted in strong colours.

On the ground coloured pavings in epoxide and crushed stone are the two dimensional extension of the installation.

In one ring a ball shaped wood and steel play element is suggested to be installed on coloured rubber paving.

6 trees could be planted.

The espalier garden is a very strict and formal definition of the central court garden.

Instead of regular trees we suggest to plant 36 espalier style pruned trees (Tilia) that form a " flying hedge" which will be a green frame in the height of 2.2 – 2.5 m.

In the center of the court garden a bend of flat shaped hedge blocks, flowering perennials and grasses form an attractive plant bed. On one end the kube shaped play element is installed on coloured rubber paving.

Четыре квадрата расположены симметрично в центре двора. В каждом из квадратов есть еще квадраты, которые повернуты под разными углами. Два крайних образуют миниатюрные садики с деревьями. В двух центральных квадратах размещен фонтан в уровне мощения и детская площадка со стенкой для лазания. Квадраты обрамлены бортом из натурального камня, на которых можно сидеть. В этом варианте можно посадить от пяти до девяти деревьев.
